

# EPoS Systems for Members Clubs

Go cashless with personal  
TouchTopUp accounts

# Flexibility at your *fingertips*.

TouchTopUp offers customers the flexibility to top up accounts either on site with cash or via credit, debit cards and online payment providers.

Add our wall-mounted industrial steel TouchTopUp cash box and you'll be offering an on-site facility to top-up accounts with coins and notes.

# Securely *on site* & *online*.

## TopUp at anytime.

**Onsite** - The TouchTopUp secure wall mounted unit provides users with a simple and effective way of topping up their card balances with cash or at the till.

On screen prompts assist customers with their transactions. TouchTopUp accepts UK coins (5p to £2) and notes (up to £20), and is easily switched to accept different tender (already used and loved in Europe).

**Online** - TouchTopUp.net allows customers to manage their accounts online from the desktop, smartphone or tablet. Features include topping up card accounts and viewing transactions right down to individual purchases. This can be used for meals, trips and daily activities.

## Benefits to Members.

- Sign on using magnetic cards, proximity cards, name and number.
- Backup procedures in the event of a forgotten card using Photo ID.
- Reduced queuing time at the till and speeds up service.
- Balances are stored centrally, not on the card, so money cannot be lost.
- Wall mounted revaluation units, such as TouchTopUp, allow members to credit their account without visiting the reception.

## Benefits to the Caterer.

- Fast and efficient throughout for club members.
- No cash on site reducing the opportunity of theft.
- Prepaid system meaning that the money is paid upfront.
- Very simple intuitive user interface requiring no technical or PC knowledge.
- All the benefits of a modern EPOS system e.g. stock control, accurate price control and analysis reporting.

# Protecting *your* *members.*

## Health & safety.

Removing cash from club members pockets and changing rooms reduces the opportunity for theft.

TouchTopUp will also provide warnings if members have allergies of any kind.

## Speed up Service

Without the hassle of cash or credit card processing, queuing times are reduced and increases the speed of service.

## Reduce Theft

Removing cash from pockets also reduces the opportunity for theft.

## Photo ID

Customer identity is confirmed by an on screen picture.

## Stay Notified

TouchTopUp will print / email daily reports, monitor how much money has been credited and how many people used the unit. It will send an email alert if it is full, or needs attention from management.

# Members clubs are now *cashless*. TopUp!

Implement a state-of-the-art ICRTouch system into your bar or restaurant and you will have an EPoS solution that is trusted by the Members Club sector globally to deliver meals on time, every time.

Control your club finances, create a cashless environment, manage members and staff accounts and keep track of your stock.

# Club members are in the *know*.

**Daily reports and  
monitoring system.**

---

The system can be configured to run prepay account balances, with a positive uplift which encourages customers to leave their accounts in credit. The customer only needs to use a TouchTopUp card rather than bring cash with them.

In many cases member cards can be linked to a Paxton Net2 door entry system, so they only need a single card for both membership and gaining entry to the venue.
